INTRODUCING LANTEK IV-S

The LanTEK IV-S is a Cable Certification System that brings a new standard to the industry, making certification projects faster, easier and more profitable.

LanTEK IV-S - Copper and Fiber Certifier

7 Second Test Time – Test and save a Cat6A test within 7 seconds.

VisiLINQ™ increases productivity – VisiLINQ™ permanent link adapters present a new and unique way to test, providing everything you need to operate the certifier and verify the results in the palm of your hand.

Future proof – Certify links to Cat8.1 and Cat8.2 including TCL and resistance unbalance measurements. The LanTEK IV-S will test up to 3000MHz providing room for future ratified ISO/TIA test standards.

No downtime or unexpected bills – The Sapphire Care Plan is designed to minimize down time, reduce the cost of ownership and protect against unforeseen repair bills.

TREND AnyWARE Cloud - Test Management Software

Eliminate costly setup errors – Project Managers pre-configure all project information in the TREND AnyWARE Cloud and Field Technicians simply download the project to the LanTEK IV-S eliminating any mistakes from manual data entry.

Live support – Colleagues, Cable Manufacturers and TREND Networks Technical Support can connect to the LanTEK IV-S remotely, minimizing troubleshooting time, increasing collaboration and reducing call-backs.

Work smarter not harder with the unique VisiLINQ™ Permanent Link Adapter

In loud server rooms the visual indication makes for immediate identification of test status instead of relying on the simple beep of other certifiers.

Colour key

- Torch mode
- Connected/Ready to test
- Pass
- Marginal Pass/Fail
- Fail

Test Management Software

The TREND AnyWARE Cloud management system enables real-time collaboration between Project Managers and Field Technicians. Field Technicians don't need to set up the LanTEK IV-S; Project Managers preconfigure the jobs and tests in the TREND AnyWARE Cloud, eliminating potential mistakes and reducing the time required to prepare reports for customers and warranties.

Cloud software

- **Operates anywhere with a web browser** – TREND AnyWARE Cloud operates on a PC, Mac and tablet devices (Android and iOS)
- **Re-certify with a touch of a button** – TREND AnyWARE Cloud allows you to re-certify projects effortlessly, saving you time, money, and unsustainable callbacks.
- **Easy to find project files** – Attach all project files including cable layout drawings, videos, and photos into the TREND AnyWARE Cloud. Everything you need in one place.
- **Share reports easier** – Use TREND AnyWARE Cloud to share links to the test reports eliminating the need to manually email large attachments.
- **TeamViewer Live Support** - Project Managers can connect to a LanTEK IV-S on the jobsite using TeamViewer to troubleshoot failed links, streamlining troubleshooting time, increasing collaboration and reducing call-backs.

TREND AnyWARE Cloud Jobs screen

The TREND AnyWARE Cloud Test Management Software is now the fastest in the world. Upload tests and generate reports even faster.

Fleet management

- **Easily manage your certifier fleet** – Fleet manager allows you to see who has the certifier, when the software was last updated, calibration due date and when the results were last synced. Allowing you to manage tester downtime and ensuring results are transferred back to the office and not lost or deleted.
